# About the project: Young Entrepreneurs Guild

The gap between the education and employment widens, and the magnitude of change in the unemployment rates varies by youth educational attainment. While bound up with the legacy of the economic crisis, the spill-over costs of the social failure in providing quality education, decent employment and social protection, could cause serious burden on the European society.

Nowadays, skills deficit and mismatch is perhaps one of the most popular explanations towards debates on problems of youth professional development and their integration as active society members. This is why, the project "Young Entrepreneurs Guild" aims at building competitive knowledge-based societies, through the development of young people's entrepreneurial potential and creativity competencies. The project intends to offer a valuable solution against youth unemployment by creating specific paths for enhancing such abilities and building up youths' entrepreneurial mindsets and capacities.

# Objectives

The project will encourage cross-sectorial partnership and cooperation at international level, by linking the institutional environment of NGOs with educational institutions and other types of educational providers, in view of operating quality improvements in the fields of education, training and youth.

The following project objectives have been specified in view of bringing positive solutions to the described situation:

## 1

### TO PROMOTE ENTREPRENEURIAL IDEAS

Through extra-curricular activities and courses in view of increasing innovation capacity and opportunistic mindset of potential youth entrepreneurs.

## 2

### TO EMBED INNOVATIVE APPROACH

Towards entrepreneurship in the field of education through mainstreaming the development of entrepreneurial awareness and behavior.

# 3

## TO ENCOURAGE YOUTH

To take part in entrepreneurial education in view of developing such mindsets and stimulate them to better engage in entrepreneurial actions.

# 4

## TO ENHANCE

Innovative and market-oriented entrepreneurial spirit among young people.

# 5

## TO DEMONSTRATE THE BENEFITS

Of multidisciplinary and multi-professional educational approaches by the development of "Training guide on entrepreneurial leadership, management and youth entrepreneurship".

# 6

## TO ENCOURAGE THE DEVELOPMENT

Of a multilevel cross-sectorial system that concretely fosters entrepreneurial learning through other than formal educational means and especially through direct involvement in entrepreneurial activities.

This training guide is prepared as a result of the efforts of the Consortium, working on this project. Throughout the 24 months of implementation of the project YEG there were two Learning teaching and training activities held.

One of those was carried out in Sofia, Bulgaria where the expert, implementing the project, together with young entrepreneurs and other young people aspiring to start a business put common efforts to create the content of this guide.

We were able to create a platform: , where extensive materials and presentations can be found. After the second LTTA in Kielce, Poland, the partnership managed to test the presented training materials in this guide.

# Introduction to entrepreneurial training

## **The Concept of Entrepreneurial Education**

Entrepreneurial education goes beyond conventional teaching methods, aiming to instill an entrepreneurial mindset in young individuals. This mindset involves fostering a sense of curiosity, creativity, resilience, and a proactive approach to problem-solving. Rather than focusing solely on business skills, entrepreneurial education seeks to empower young minds with the tools and attitudes necessary to navigate an ever-changing world.

## **Importance of Entrepreneurial Education for Young People**

### **1. Adaptability in a Dynamic World:**

The global landscape is evolving at an unprecedented pace. Entrepreneurial education equips young people with the adaptability needed to thrive in a world where change is constant. By cultivating resilience and a willingness to embrace new challenges, students are better prepared for the uncertainties of the future.

## **2. Fostering Creativity and Innovation:**

Entrepreneurship thrives on creative thinking and innovation. Through entrepreneurial education, trainers can nurture the ability of young minds to think outside the box, explore new ideas, and develop innovative solutions. This creativity becomes a valuable asset in both professional and personal endeavors.

## **3. Empowering Critical Thinking:**

Entrepreneurial education emphasizes critical thinking and problem-solving skills. Trainers guide students in analyzing situations, identifying challenges, and devising effective solutions. These skills not only contribute to success in entrepreneurial ventures but are applicable across various aspects of life.

## **4. Building Effective Communication and Collaboration:**

Entrepreneurs often work in collaborative environments. Trainers play a crucial role in developing the communication and teamwork skills necessary for effective collaboration. Teaching students to express their ideas clearly and work harmoniously in teams prepares them for real-world entrepreneurial scenarios.

## **Objectives for Trainers in Entrepreneurial Education**

### **1. Cultivate an Entrepreneurial Mindset:**

The primary objective is to cultivate an entrepreneurial mindset among young individuals.

This involves fostering a sense of curiosity, a willingness to take risks, and a passion for learning and problem-solving.

### **2. Facilitate Practical Skill Development:**

Trainers should focus on practical skill development, encompassing creativity, critical thinking, financial literacy, and effective communication.

The goal is to provide students with tangible skills they can apply in various contexts.

### **3. Inspire Confidence and Initiative:**

Entrepreneurial education aims to instill confidence in students to take initiative. Trainers should create an environment where young individuals feel empowered to pursue their ideas, take calculated risks, and learn from both successes and failures.

### **4. Connect Learning to Real-World Applications:**

To make the learning experience meaningful, trainers should connect theoretical concepts to real-world applications. This bridges the gap between classroom knowledge and practical entrepreneurship, making the education relevant and impactful.

## 5. Encourage a Lifelong Learning Attitude:

Entrepreneurial education is not just about preparing students for specific careers; it's about fostering a lifelong learning attitude. Trainers should inspire a commitment to continuous learning and adaptation, preparing young individuals for the ongoing challenges of the future.

In this guide, we will explore effective strategies, engaging activities, and proven methodologies to help trainers impart entrepreneurial skills to the next generation.

By focusing on these objectives, trainers can play a pivotal role in shaping resilient, creative, and forward-thinking individuals ready to navigate the complexities of the 21st century.

# About the guidebook:

## **The presented training guide has 3 main sections:**

- Theoretical materials on the 7 most important topics, related to entrepreneurial education
- Practical exercises and activities for trainers to use in order to teach the described topics
- Additional European resources that foster entrepreneurship

The topics were chosen after conducting a field research with the target groups: young people, entrepreneurs and stakeholders in the partner countries: Bulgaria, Cyprus, Greece, Italy, Poland and Romania. The results of that research marked the main interests of entrepreneurial education.

Those were tested on both training activities, throughout the duration of the project and the study and training materials that have been of most interest to young entrepreneurs and that have been most effective during the trainings.

# 1. Leadership and People Management

## 1. What are Leadership and People Management?

**Leadership** is the process of influencing and guiding individuals or a group toward achieving a common goal. It involves the ability to inspire, motivate, and direct others in a way that maximizes their potential and contributes to the success of a shared vision.

**People management**, also known as human resource management, involves the strategic and holistic approach to overseeing and developing an organization's most valuable asset: its people. It encompasses *recruitment, training, motivation, and retention of talent to achieve organizational objectives.*

# The Essence of Leadership

In an entrepreneurial context, effective leadership involves making informed decisions and inspiring a team to work towards success collectively. Leadership is not just about authority; *it's about influence, vision, and the capacity to empower others.*

## Main Topics in Leadership

- **VISIONARY LEADERSHIP:** Refers to the ability to articulate the vision effectively, motivating and aligning team members towards shared goals. In the entrepreneurial context, *visionary leadership is a catalyst for innovation and resilience.*
- **ADAPTIVE LEADERSHIP:** Refers to recognizing the need to adjust leadership styles to different situations and team dynamics. In the entrepreneurship landscape, *it is crucial, to maximize the potential of their teams.*
- **EMOTIONAL INTELLIGENCE:** Refers to possessing a deep understanding of their own emotions, helping manage their reactions and decision-making effectively. Leaders with high emotional intelligence *can inspire confidence and build resilient teams.*
- **SERVANT LEADERSHIP:** Refers to prioritizing the needs of their team, and fostering a supportive environment. *Collaboration is a central theme and contributes to more employee satisfaction and high motivation.*
- **ETHICAL LEADERSHIP:** Refers to considering the long-term consequences of their decisions, *prioritizing sustainability and ethical business practices.*

## The Essence of Leadership

- **SUSTAINABLE LEADERSHIP:** Considers environmental, social, and economic factors in decision-making, ensuring that *the organization's actions contribute positively to the broader community and the planet.*
- **LEADERSHIP OF THE FUTURE:** Anticipates the evolving dynamics of the business world, *embracing innovation, technology, and inclusivity.*

## Leadership in Entrepreneurship

- **BUILDING AND LEADING A COHESIVE TEAM:** A cohesive team is one where individuals, with their diverse skills and backgrounds, work collaboratively towards common objectives. A skilled leader not only assembles a team with complementary talents but also nurtures an environment where every team member is motivated and aligned with the overarching goals of the venture.
- **DECISION-MAKING UNDER PRESSURE:** A leader's decisiveness under pressure not only steers the venture through challenges but also sets a precedent for a resilient and forward-thinking organizational culture.
- **ADAPTABILITY IN A DYNAMIC ENVIRONMENT:** Entrepreneurs need to navigate uncertainties, adjust strategies, and sometimes pivot their entire business model to thrive in such an environment. Adaptability enables entrepreneurs to embrace change rather than fear it.
- **STAKEHOLDER RELATIONSHIPS.** Cultivating positive relationships with stakeholders is a strategic imperative for sustainable success. Effective leadership is instrumental in ensuring transparent communication, building trust, and fostering strong relationships with each stakeholder group.

## Methodology. Teaching Approaches

- **CASE STUDIES:** Utilising real-world case studies forms a foundational element of our teaching methodology, providing tangible insights into effective leadership and people management practices within entrepreneurial settings. These case studies bring theory to life, offering a glimpse into the challenges and successes of renowned entrepreneurs.
- **INTERACTIVE DISCUSSIONS:** Through interactive sessions, participants are invited to share their own experiences, challenges, and insights related to leadership and people management. This collaborative learning environment promotes the exchange of diverse perspectives, creating a rich tapestry of shared knowledge.
- **ROLE-PLAYING:** Offers a practical and immersive learning experience. Participants step into the shoes of leaders facing common challenges in the entrepreneurial journey. This hands-on approach allows individuals to practice and refine their leadership skills in a controlled environment, providing a safe space for experimentation and learning from both successes and setbacks.

## Common Challenges in Leadership

- **TEAM CONFLICT:** Strong leadership includes not only managing conflicts as they arise but also proactively creating a team culture that creates open communication, respect for differing viewpoints, and a shared commitment to resolving disagreements constructively.
- **DECISION OVERLOAD:** Effective leadership demands the ability to manage decision fatigue, prioritize effectively, and delegate when necessary.
- **ADAPTABILITY TO MARKET CHANGES:** Leaders need to foster a culture of continuous learning and market intelligence within their teams, ensuring that the organization remains agile and responsive to external changes.
- **MAINTAINING WORK-LIFE BALANCE:** Entrepreneurs may find themselves consumed by the demands of the business, leading to burnout and diminished effectiveness. Managing this challenge involves not only setting clear boundaries between work and personal life but also cultivating resilience and self-care practices.

## Common Challenges in Leadership

- **FOSTERING INNOVATION:** The need to continuously generate creative ideas, adapt to changing market landscapes, and stay ahead of competitors demands a culture of innovation. Leaders must create an environment that stimulates creativity, values experimentation, and rewards calculated risk-taking.
- **SCALING OPERATIONS:** Scaling brings with it complexities related to maintaining the initial entrepreneurial spirit while establishing more formal structures. Leaders must navigate the transition from a small, nimble startup to a larger, more structured organisation, ensuring that the values and agility that contributed to early success are not lost in the process.

## 2. Sustainability and green education

Sustainability is defined as “ the development that meets the needs of the present without affecting future generations’ needs” (Malik et al., 2020). Sustainability is based on three main pillars: social, economic and environmental behaviors and performance.

Sustainable entrepreneurship is opportunity oriented and aims at generating new products, services, production processes, techniques, and organizational modes which substantially reduce social and environmental impacts and which increase the quality of life.

### **What is sustainability?**

Sustainability is a concept that describes the social goal of improving and maintaining human well-being over a long-term time horizon within the critical limits of life-sustaining ecosystems.

The Definition of Sustainability and the role of Sustainable Development Goals:

- **World Commission on Environment and Development(WCED)** defined sustainability as “the development that meets the needs of the present without affecting future generation’s needs” (Malik et al., 2020)
- **Sustainability** refers to the ability to sustain social, economical, and environmental performance, mutually supportive of a human system over time(The triple bottom principles equally perform to establish the above-mentioned categories to improve the impact in society, economy, and the environment(Roca-Puig, 2019)
- **European Commission and the United Nations** committed to the 17 Sustainable Development Goals(SDGs) to European Union to end poverty, protect the planet and ensure that all people enjoy peace and prosperity(European, 2020).

**To improve the sustainability performance of a business, the key is to include Sustainable Development Goals(SDGs) in the organizational strategy. Integrating sustainability into strategic decision-making could improve the overall performance of your business (Donoher, 2017).**

## Why is it important for entrepreneurs?

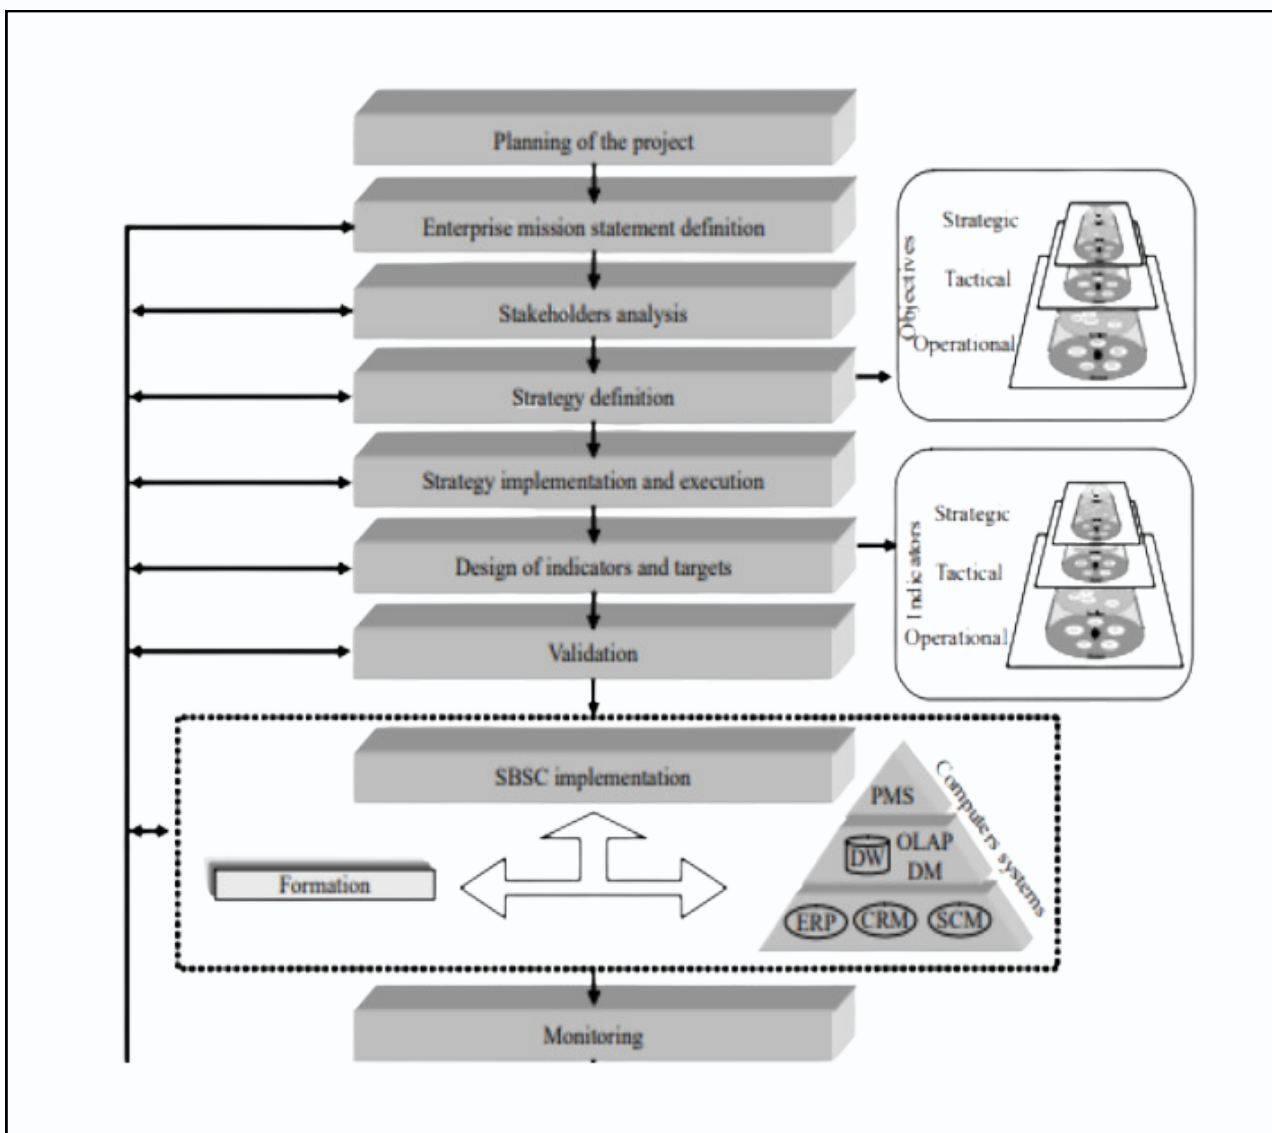

According to several research studies, Sustainability culture is defined as a company's recognition of the impact of the company's activities on society and communities and the need to minimize it, which translates into a philosophy and values that drive the decision-making process of the firm.

In other words, the sustainability culture improves the procedures within the organization and at the same time has a positive impact on stakeholders' and customers' perceptions (Marshall et al., 2015).

Moreover, as Parrish states “a successful sustainability-driven enterprise must be able to sustain its own activities while contributing to the sustainable development of the larger social–ecological system of which it is part provides an important degree of specificity to this view with her discussion of sustaining production, explained as “production which sustains the social and biophysical context within which it takes place” (Parrish, 2010).

Furthermore, sustainability is an important strategic approach for entrepreneurs because of the environmental impact of SMEs. According to statistics, SMEs must improve their procedures in facing environmental challenges. SMEs are responsible for 64% of the pollution in Europe (Rabadán & Sáez-Martínez, 2017).

## Methodology

There are different approaches when it comes to adapting and implementing sustainability. The above-mentioned graph presents eight phases of the method to approach sustainability strategic planning.

## PLANNING THE PROJECT:

The first step of the proposed methodology is the planning and development of the project. It is crucial to consider the cultural aspects within the organization. In addition, during this phase is very important to create the plan for the project, define tasks, resources, timelines, examine and establish the quality control mechanisms and draw up the plan for change.

# 1

# 2

## DEFINING THE ENTERPRISE MISSION STATEMENT:

This phase focuses on the internal and external environment. It is crucial to understand the business. Understanding the enterprise in the competitive environment, the internal situation and culture and stakeholders' strategic relevance. Phase 2 aims to define the mission, vision and values of the enterprise. According to (Muñoz et al., 2008), it is necessary to review the mission statement of the company in order to be reformulated with sustainability concerns in mind, taking into account all the stakeholders of the company as a whole and defining a set of values that has to be considered suitable for all parts of the enterprise environment, both at present and in the future (Muñoz et al., 2008).

# 3

## ANALYSING STAKEHOLDERS

The purpose of phase 3, is to carry out an extensive stakeholder analysis. Analysis of stakeholders allows the enterprise to integrate their needs and expectation into its strategy. The first step is to identify all those that affect or are affected by the business activities. According to Leon en al., "It is also necessary to identify all their needs and expectations related to the firm. The set of needs and expectations evaluated from the stakeholders' ranking of strategic relevance will allow the company to identify the critical success factors to be considered in strategy formulation". (León-Soriano et al., 2010).

# 4

## STRATEGY DEFINITION

Strategy definition refers to determining the future direction of the enterprise. For the sustainable strategy definition, there are four approaches that can be used to respond to social and environmental concerns: reactive, defensive, accommodative and proactive.

# 5

## STRATEGY IMPLEMENTATION PLAN DEFINITION

For strategy implantation plan, the enterprise needs to identify the necessary modifications that will ensure that planned objectives are successfully fulfilled, granting that day-to-day activities are performed in a manner that is consistent with these sustainable objectives.

### DESIGN OF INDICATORS AND TARGETS

# 6

The following table presents an analysis on how to design indicators and set targets(Lohman et al., 2004).

Attribute	Description
Identifyer	Name of the indicator. Representative and ambiguity avoinding.
Aim	Description of purpose of the indicator.
Perspectives	Sustainability, stakeholders or structure.
Cluster / Stakeholder	Cluster or stakeholders within perspective containing the metric.
Keeper	Person who guarantees indicator fulfilment.
Formula	Equation for the exact calculation of the metric.
Units of measure	Units used the measure the indicator.
Reference value	The standard value of reference for the indicator.
Allowed interval	Maximum and minimum values for the metric.
Frequency	Units used the measure the indicator.
Validity	The standard value of reference for the indicator.
Relevance	Maximum and minimum values for the metric.
Interpretation	Signification and interpretation of possible results.
Iniciatives	Initiatives for fulfilling the indicator,.
Corrections	Actions to be followed if indicator is out of range.

## VALIDATION

The purpose is to use the results achieved over a period of time in order to look for a relation among the cause and effect indicators. Measure the relation among the chosen variables and make further adjustments to the proposed system.

# 7

# 8

## IMPLEMENTATION AND MONITORING

A system can support the collection of data, implementation of a sustainable strategy and also monitoring of the resources. Provide important information and data to adapt processes, procedures and decisions on how to improve the enterprise strategy.

### CHALLENGES WHEN IMPLEMENTING SUSTAINABILITY:

The new sustainable approach can phase difficulties in the implementation and adaptation since it involves changing the corporate culture and employee attitudes, defining responsibilities and accountability, establishing organizational structures, information reporting systems and operational practices.

#### Main challenges: (Siegel et al., 2019)

- Manpower constraints
- Financial constraints
- Poor management and leadership
  - Lack of strategy
  - Resistance
- Project selection

### **3. Organizational learning and continuous improvement:**

Learning culture is a set of practices and processes that encourage education and constant improvement through collaboration with employees. It's supported by values like open conversation and individual improvement. In a learning culture environment, the importance of learning serves as a core value of an organisation, influencing and improving the way that the organisation functions.

# What is organizational learning?

Organizational learning is the process where an organisation improves itself over time by gaining knowledge and experience. It's an organisation where learning culture is actively present, and everyone works together as one. Organizational learning is a process consisting of three stages:

# 1

## Ideation

The idea is born.

# 2

## Action

The idea is produced/implemented.

# 3

## Reflection

Taking time to reflect on and evaluate the idea.

Usually learning occurs in the last stage. It is important that an organisation keeps track of this gained knowledge, and that it can be transferred. Knowledge retained by an individual employee cannot be properly transferred and distributed across the whole organization, as an individual can leave and take their knowledge with them. Embedded knowledge can be properly retained and distributed across the organisation's DNA – and this is why it's important to prioritise a continuous learning culture.

**Learning culture is a crucial factor to organizational learning** – the difference between the two concepts is the perspective with which an individual looks at it. A learning culture is more from an insider, individual perspective, and it usually results in organizational learning, which provides a zoomed-out perspective of the whole process.

## Why is organizational learning important for entrepreneurs?

Organisations with a successful learning culture are more likely to experience sustainable growth, profitability, transformation, and productivity.

- These findings are backed up by research from Bersin by Deloitte.

Organizational learning is important because it's the future. Technology keeps evolving faster and faster, new problems arise along with new opportunities. Nowadays, the modern learner has access to information much quicker than they would 30 years ago. Changes are inevitable, and it's easier to reach to them once you already have a learning culture in place.

# Leading in Learning

## Building capabilities to deliver on your business strategy

Learning solutions are based on business needs	Learning solutions are customized to populations and individuals	Learning solutions meet the required standards of excellence, are piloted, benchmarked, evaluated and continuously improved
Learning solutions are designed to support the transfer of learning back into the business	<b>Principles for an organization's L&amp;D are changing</b>	Learning solutions achieve what they set out to do
Learning solutions are designed with the future in mind	Business leaders participate in the design and delivery of learning solutions	Learning solutions are designed as a connected, integrated part of the development journey

**Untethered**  
Today's employees find themselves working from several locations and structuring their work in non-traditional ways to accommodate their lifestyles. Companies are finding it difficult to reach these people and even harder to develop them efficiently.

- 37% of the global workforce is expected to be 'mobile' by the end of 2015
- 30% of full-time employees do most of their work somewhere other than the employer's location
- 20% of the workforce is comprised of temps, contractors and freelancers

**Bersin by Deloitte.**

**Meet the modern learner**

of 1 typical workweek is all that employees have to focus on training and development

**Collaborative**  
Learners are also developing and accessing personal and professional networks to obtain information about their industries and professions.

- ~80% of workforce learning happens via on-the-job interactions with peers, teammates, and managers
- Learners are:
  - asking other people
  - sharing what they know
- 55% of training courses are delivered by an ecosystem of 2,000+ peer learners

**On-demand**  
Employees are accessing information - and learning - differently than they did just a few years ago. Most are looking for answers outside of traditional training and development channels. For example:

- 70%+ of employees access search engines online courses to learn what they need for their jobs
- 50-60% of people are increasingly turning to their smartphones to find just-in-time answers to unexpected problems

**Empowered**  
Rapid change in business and organizations means everyone needs to constantly be learning. More and more people are looking for options on their own because they aren't getting what they need from their employers.

- 2 1/2 years is the half-life of many professional skills
- 38% of workers say they have opportunities for learning and growth at their workplace
- 62% of IT professionals report having paid for training out of their own pockets

**Deloitte Learning Solutions Offerings:**

**Learning Strategy & Operations**

We can help you to define and realize the optimum, aligned and efficient learning organization

- Creating or refreshing a **learning strategy**
- Developing a **business case** for learning
- Creating a **Corporate University** or CoE
- Optimizing efficiency and effectiveness of a learning **organization and processes**
- Aligning** learning and business processes to support HR and Talent strategies
- Developing a **function specific learning strategy**

**Learning Design & Development**

We can help you to deliver high impact learning content

- Changing employee behaviors** to align with new processes, requirements or strategies
- Providing large-scale training on **new systems**
- Educating employees to comply with **regulatory requirements**
- Training employees on customer experience, call centers, or other **customer focused initiatives**

**Learning Technology**

We can help you to optimize your enabling technologies and emerging tools

- Implementing a **learning (content) management system (LMS / LCMS)**
- Creating and implementing a sustainable **knowledge management strategy**
- Understanding how **social computing tools** can deliver business benefits for Learning & Development, Knowledge Strategies, Customer Experience, and Talent Attraction and Retention

**Bersin by Deloitte.**

**Leading practice research, analytics and insight**

**Talent research, advisory & benchmarking in 5 domains:**

1. Learning & Development
2. Talent Management
3. Leadership & Succession
4. Talent Acquisition
5. HR

**Research & tools**

- Frameworks
- Maturity models
- Factbooks
- Sample RFPs
- Case studies
- Solution provider library

**Networking & professional development**

- Member roundtables
- IMPACT Conference

# Methodology

There are 7 methodological steps to build a learning culture:

## 1 **Assess the existing environment and identify gaps and weaknesses**

What is your employees' attitude to learning new skills? What are you already doing that you can label as continuous learning? What's working, what's missing, what's not working?

## 2 **Ask employees for feedback and compare it to earlier identified problems**

Ask around. What do your employees want to learn and how do they want to do it?

## 3 **Fill in the gaps**

This is the part where you execute the training – are you going to hire an external company, or are you going to ask more experienced employees?

## 4 **Make learning a habit**

Try to introduce the process of learning into your company's workflow.

## 5 **Reward continuous learning.**

By acknowledging and rewarding employees who support the new culture, you're setting a further example of how to implement this workflow.

# 6

## Choose the right people

Once you know how you want your internal culture to look, keep that at the top of your mind during your next hiring process. What works best in a learning culture is an attitude that's open-minded, forward-thinking, proactive, and curious.

# 7

## Apply it to yourself

Setting yourself as an example could really shift everything in your favour. To maintain this freshness and curiosity, ask for continuous feedback from employees. Not only is this going to help with their engagement, but it will also keep you on your toes. Regularly check in with your staff, provide them with positive and constructive feedback, and let them reciprocate. This creates a supportive environment where everyone can exchange ideas. Highlighting knowledge or skill gaps is a good way to keep everyone involved curious and motivated to improve.

## **CHALLENGES WHEN IMPLEMENTING A LEARNING CULTURE:**

Although learning culture is a great thing to include in your organisation's DNA, it can be challenging to implement, especially if you don't include it in your initial business plan.

- Lack of motivation

To incorporate a successful learning culture, informal learning has to be present. It is not enough to give employees formal training – it's necessary to provide them with tools and motivation to continue learning alongside their duties. Cultivating an attitude of continual improvement can be tricky, and it requires the right leadership, attuned to each employee's needs. Pushing them might backfire and take away flexibility, while being too laid back can fail in addressing the importance of continuous learning.

- **Lack of proper resources**

Allocating proper resources to encourage employees can be difficult. Things like not giving staff enough dedicated time for learning, not having access to resources or failing to explain the link between learning and their future career development can cut the implementation short.

- **Lack of leadership effort**

Organisations need their leaders to be completely on board for this strategy to work. It's tough to set the right example when leaders are not actively supportive of staff.

- **Lack of administrative support**

As mentioned before, willingness to learn must be embedded in organisation's DNA. Otherwise, it's difficult to manage the right processes and promote collaborative learning, as the usual business model calls for strict hierarchy and individualism in the workplace.

## 4. Financial management And Business Models

Financial management and business models play a crucial role in the success and sustainability of a business. Financial management involves the strategic planning, allocation, and monitoring of financial resources to achieve business objectives, in order to make informed decisions, optimise resource allocation, and maximise profitability. The business model outlines the core components of a business, including its target market, value proposition, revenue streams, and cost structure.

A business model creates the setting in which the business can continue to grow and develop, while effective financial management ensures the monitoring of costs and revenue streams required to support this growth.

# What are financial management and the business model?

Basic financial management consists of a series of actions meant to oversee and control the financial resources of an organisation, with the aim of achieving its short term and long term goals. A successful basic financial management strategy will ensure that the organisation remains financially stable while achieving its goals and objectives.

- Creating a budget
- Forecasting revenue and expenses
- Managing cash flow
- Making strategic financial decisions
- Keeping accurate financial records
- Preparing financial statements
- Monitoring financial performance
- Financial planning for the future (ensuring the company has enough money for investment and expansion)

A business model is a plan or strategy which is used to foresee how a company will generate revenue and make a profit. A business model outlines several aspects of the company's activity, such as the products or services offered, its target customers, and methods for generating income.

# Why are financial management and the business model important for entrepreneurs?

Financial management is a key factor in the continuity of a business, as it supports growth and successful overall management of a business. Some of the benefits of financial management are:

- Financial management and planning reduces the risk of failure of a business.
- Access to finance is significantly improved by efficient financial management.
- Financial management supports monitoring and evaluating the success of a business.
- Overall costs are minimised through financial management.
- Financial management supports the continuous improvement of a business and brings a better market understanding

# Methodology

There are a number of steps to be followed when it comes to the methodology for financial management and business model development.

Financial Management Methodology:

- Set clear financial goals and objectives for the organisation (referring to profit, cash flow and growth opportunities and needs);
- Ensure appropriate financial planning and budgeting, in line with the set goals and objectives, over a specific period of time;
- Measure financial performance regularly and monitor key performance indicators to ensure the achievement of the pre-established objectives.
- Adopt a strategy for managing cash flow effectively, while meeting operational costs;
- Review expenses and identify cost-effective ways to improve without affecting the quality of services offered;
- Assess financial risks appropriately and implement strategies and practices to mitigate them;
- Report and comply through financial reporting systems to ensure that the information is available to stakeholders in a timely and accurate manner.

# Business Model Development Methodology

## 1 Market analysis

Conduct a comprehensive analysis of the target market, customer needs, competitive landscape, and industry trends to identify market opportunities and potential challenges.

## 2 Value proposition

Define a unique value proposition that sets the business apart from competitors and addresses customer pain points. Determine how the business will create value for customers and differentiate itself in the market.

## 3 Revenue streams

Identify and design revenue streams based on the value proposition and customer segments. This includes determining pricing strategies, revenue models (e.g., one-time sales, subscriptions, licensing, etc.), and exploring potential partnerships or collaborations.

# 4

## Cost structure

Determine the cost structure required to deliver the value proposition and generate revenue. Analyse fixed costs, variable costs, overheads, and operational expenses to ensure a sustainable and profitable business model

# 5

## Prototyping and testing

Develop prototypes or minimum viable products (MVPs) to test the feasibility and viability of the business model. Gather feedback, iterate, and refine the model based on market response and customer feedback.

# 6

## Scalability and growth strategies

Consider scalability factors and develop strategies for growth, including expansion into new markets, product/service diversification, or leveraging technology and innovation.

# 7

## Continuous monitoring and adaptation

Regularly review and assess the performance of the business model. Stay updated on market trends, customer preferences, and industry dynamics. Adapt the model as needed to remain competitive and seize new opportunities.

## **CHALLENGES WHEN IMPLEMENTING FINANCIAL MANAGEMENT AND BUSINESS MODELS**

- Effective management of cash flow can prove to be challenging within many businesses, due to the nature of balancing cash inflow and outflow. Monitoring and projecting revenue and expenses are essential for achieving an effective management of capital.
- Planning and monitoring a pre-established budget is an essential aspect of financial management. Any difficulties that appear in estimating expenses and revenue may lead to inappropriate allocation of resources, which is why constant monitoring should be adhered to.
- Lack of capital may lead to significant challenges for a business. This may limit investment opportunities and restrict growth plans.
- Debt can provide the required funds when needed, but it can become a challenge when it is not managed efficiently and it can lead to financial instability and even bankruptcy.
- Appropriate financial reporting, if done timely and accurately, is essential for regular monitoring and decision making purposes. Challenges may be encountered in this area, but respecting accounting standards and transparency are essential.

## 5. Innovation, Creativity and The Valuing Idea Process

Innovation in entrepreneurship consists of creating new ideas to generate and boost the results in terms of profits, community benefits and accomplishing the enterprise goals.

Most entrepreneurs use innovative ideas to update their business models and upgrade their products and results in the market.

Entrepreneurs know innovation is the key to transforming a great idea into a business opportunity. This is why the most successful business begins by trying to accomplish and concrete innovative ideas.

# What is the innovation, creativity and valuing ideas process?

What do we mean when we talk about innovation?

This term refers to a process involving a new idea, method, strategy, or activity that can introduce something original to our business routine. Innovation can be intended in various ways because it can impact the business model or just be a brand-new idea, a proposal for a new service, or a revolution in the process making.

However, when we talk about innovation, we do not mean that we are creating something from the beginning because innovation has to do with the improvement of existing products, services, or ideas. Innovation's main characteristic is the power to add value to existing products or services.

The potential of innovation lies in its capability to disrupt the status quo. Innovation brings support to change, but this does not automatically translate to a new business or entrepreneurship. Innovation does not mean invention.

The sources of innovation are diverse and complex. An innovation process can be initiated by new market horizons, knowledge, technological changes, economic changes, paradigmatic crises, etc. However, the two key allies of innovations are critical thinking and creativity.

# Why are innovation, creativity, and the process of valuing ideas important for entrepreneurs?

As we mentioned before, innovation has to do with replacing or improving something. In this regard, it is the main tool entrepreneurs exploit to develop different strategies and remain competitive in the market.

The innovative enterprise is the one which has the ability to come up with innovative products and services, not only to meet the market's trends and demands but even to create responses to emerging needs and claims.

As competition is one of the main engines of the market, business entrepreneurs require continuous innovation processes to remain relevant and responsive in their business sector. Let's take a look on the main benefits coming from the use of innovation:

## PRODUCT DEVELOPMENT

The use of innovation can really help your business to research and develop your products both in terms of quality and consumer needs response. However, not only must the product be able to meet the needs of consumers, but it must also be attentive in terms of economic and environmental sustainability. In this way, your product or service can rely on a good reputation in the market, standing out among various alternatives lacking in this respect.

## BRAND IDENTITY REINFORCEMENT

Thanks to innovation, your brand can develop and define its identity in the large market cauldron. Innovation can be the key to giving you a well-defined identity and help you to be recognizable by positioning yourself in a privileged position with respect to the target group you want to reach.

## AUGMENTED COMPETITIVENESS

Adding innovation to your products and services not only increases your potential for attractiveness in the marketplace, but more importantly, it is able to increase your value.

As stated above, creativity and critical thinking are the two key factors for a consistent innovation process.

In fact, having a creative and critical attitude when it comes to entrepreneurship means being able to look beyond or across what we want to implement or improve. It is only with creativity and a lateral thinking approach that ideas can be truly innovative and useful to implement solutions that work and compete with other products in the market.

Creativity and critical thinking, then, are the best tools for problem-solving; with the right inspiration, one can really come up with disruptive solutions and products.

When it comes to innovation and its relationship to creativity, we must keep in mind that this is the tool through which an innovative idea can be really valued.

First of all, we must clear out what we mean by “valuing an idea” and how this can be made possible. As mentioned earlier, not all innovations are revolutions. This is crucial to understand how to turn an innovative idea into a winning product in the market.

Here are the most successful strategies to be implemented to enhance innovative ideas:

## BRIEF THE IDEA PRECISELY

This step is crucial to understand if you first have a clear and well-defined idea so you can communicate it effectively. If you cannot figure out its contours, instead, you still need to work on defining its outline and understanding how it can impact your target market. In the process of identifying your idea, you must focus on these four key points: impact (what is the expected impact?), excitement (how much does this idea involve the public?), originality (how original is it?), durability (how long will the innovation last? Is it sustainable?)

## CALCULATE IN ADVANCE WHAT IS THE IDEA WORTH AND VALUE IT THROUGHOUT ITS DEVELOPMENT

Or 4-Stage Process

This part is fundamental in order to calculate the economic value of the idea. It is necessary to reckon with its sustainability to see whether it is feasible and can contribute to the well-being of the business or whether its implementation is too costly in a broader sense. You will need to chew some economics to understand how to:

# 1 Target your value

In this phase, you must calculate in advance the value you need. The targeted value will need to take into account cost (how much will it cost to develop/implement the idea against the anticipated returns?), market (what's out there now?), income (how much is the idea going to make us over time?) and sustainability (is the product sustainable in terms of economic/social/environmental durability?).

# 2 Judge its value

Are you sure that your idea is worth it? Compared to others, which one do you consider the most valuable? Yours or others?

# 3 Calculate anticipated value

Try to figure out what value your idea will generate.

# 4 Calculate achieved value

How much was the idea worth after distributing it?

# Methodology

Concerning methodologies for teaching and becoming familiar with the concepts of innovation, creativity, and the process of valuing ideas, mixing different learning modes is undoubtedly more effective from a practical point of view.

The mixed methodology allows the learner to engage from different perspectives and is also more usable and inclusive in the sense that it suits various types of mindsets in the learning process.

Indeed, there is a need for a teaching phase that includes a theoretical approach to the concepts being explained so that their contours, meaning and relationships can be clearly delineated. This step can also be implemented thanks to modern education platforms that enable effective self-learning processes that are adaptable to the student's needs.

The theoretical approach, however, must not be exclusive: in order to learn concepts and, above all, to be able to use them in practice, it is necessary to have the possibility of experimenting with them and an interactive methodology through which the student is asked to put the learned concepts into practice to check their learning and any eventual gap.

This methodology, moreover, especially due to the student's predisposition to learning through an online platform, represents a kind of challenge for the student, who is called upon to learn in a way that they can adapt to their needs and, above all, that helps them to learn and gain awareness step by step.

In addition to being innovative and aligning with the purpose of the module, the use of an online platform by using digital tools, videos, images, interactive content, etc., fosters and stimulates the creativity of the participants, inviting them to get involved in the process of understanding something new and help to make the learning experience more creative.

Also to be considered is the capacity that the use of digital tools has from the point of view of inspiration. Through familiarizing the student with innovative methods of learning, they are called upon to open their minds and rethink their business ideas based on new technologies and to understand how enhancing their ideas is a process that also goes through the means of today's increasingly technological - which an entrepreneur is ready to use.

## CHALLENGES WHEN IMPLEMENTING INNOVATION, CREATIVITY AND THE VALUING IDEAS PROCESS

The most frequent difficulties that can be encountered when it comes to innovation, creativity, and the process of enhancing ideas are:

- **Not having actual innovative ideas:** for this reason, it is necessary to conduct thorough research before trying your hand at a business idea and be sure that it is not already on the market- or perhaps has yet to be implemented, but with poor results. The research process, in this regard, is crucial to understand how innovative the idea is and where it can be improved.
- **Not knowing how to implement the creative idea:** very often, it is a lack of adequate tools for the idea we have imagined. This can be solved by continuous research and comparison with a network of people embedded in that environment who can advise us or from whom we can find inspiration.
- **Finding funding or funders who believe in the innovative idea:** one of the most practical difficulties is not finding someone willing to fund the idea for which we are expending effort. To overcome this impasse, entrepreneurs must undoubtedly work on their charisma and ability to present their ideas to the target audience, so they must work on personal branding and marketing skills. But on the other hand, every potential entrepreneur must become aware of the alternative ways of financing their idea that has especially bloomed in the digital era as crowdfunding, microcredits, equity, etc.

## 6. Networking and Marketing

Networking provides invaluable opportunities to connect with industry experts, potential partners, and mentors, fostering knowledge sharing, collaboration, and the establishment of a personal brand. Simultaneously, marketing plays a pivotal role in enabling entrepreneurs to effectively communicate the value of their products or services, reach their target audience, build brand awareness, and drive sales. The fusion of networking and marketing creates a powerful synergy that propels the growth and success of new ventures in today's fiercely competitive business landscape.

# What is Networking and Marketing?

Networking and marketing are vital for new entrepreneurs in today's competitive business landscape. Effective networking allows entrepreneurs to build valuable relationships, establish a positive reputation, and leverage connections for career advancement.

It involves meeting new people with a purpose and goal in mind, fostering trust, support, and mutually beneficial relationships. Networking is a skill that differentiates a mediocre career from a remarkable one and opens opportunities for collaboration and growth across industries.

Similarly, marketing is essential for entrepreneurial success. It goes beyond simple advertising and involves understanding consumer needs, crafting compelling messages, and delivering value to customers.

Marketing helps businesses differentiate themselves, establish brand awareness, and cultivate customer loyalty. Utilizing various marketing channels, entrepreneurs can effectively reach their target audience, engage with them, and drive business growth. A well-executed marketing strategy enables entrepreneurs to communicate their value effectively, stand out in the marketplace, and succeed in any industry.

## In conclusion

Networking and marketing are both essential for professional success. Networking facilitates relationship-building and unlocks opportunities, while marketing empowers entrepreneurs to effectively reach their target audience and establish a strong brand presence. By mastering these two aspects, entrepreneurs can maximize their chances of success and thrive in today's competitive business environment.

# Why is Networking and Marketing important?

- Exchanging information: Networking allows entrepreneurs to share experiences, ambitions, and insights, leading to the acquisition of fresh ideas they may not have considered otherwise. Whether it's a small or large business, innovative ideas can help entrepreneurs stand out and thrive in their respective fields.
- Confidence and well-being: Professional networking enhances communication and interpersonal skills, ultimately boosting an entrepreneur's confidence and personal well-being. It also fosters a supportive network of like-minded individuals who provide encouragement and support.
- Broadening entrepreneurial perspectives: Marketing knowledge expands entrepreneurs' perspectives, fostering creativity and developing strategic thinking abilities. This broader understanding allows entrepreneurs to make informed decisions and develop effective marketing campaigns.
- Building a strong personal brand: Both networking and marketing efforts contribute to maintaining a strong personal brand. Through networking, entrepreneurs can access new opportunities, while a well-executed marketing strategy supports and fully exploits these opportunities.

- Adaptability to the changing business landscape: Networking and marketing equip entrepreneurs with the skills and knowledge necessary to navigate the ever-changing business landscape. Marketing techniques evolve with advancements in technology and consumer behavior, requiring entrepreneurs to stay updated to remain competitive. Networking ensures entrepreneurs stay connected to industry trends, market demands, and emerging opportunities.

Therefore, investing in networking and marketing strategies is a vital step for entrepreneurs seeking personal growth and business success. By prioritizing networking and marketing, entrepreneurs can position themselves for long-term success, seize opportunities, and make a significant impact in their industries. Embracing these strategies not only fosters professional growth but also empowers entrepreneurs to thrive in a competitive business environment and achieve their goals.

# Methodology

For a new entrepreneur to familiarize themselves with the concepts of marketing and networking, there are several exercises and methodologies that can be followed. Specifically, for improving their networking skills, the following exercises and practices can be highly beneficial:

1

As networking is about forging relations investing time and effort to keep in touch with the network is highly advised. From a simple invitation for a coffee to a short video call a well-established professional relation can be forged.

2

When attending networking events, it's important to engage in meaningful conversations, actively listen, and ask relevant questions to establish connections. Also, online networking platforms such as LinkedIn offer excellent way to expand one's network. Therefore, when a professional and compelling profile has been created, joining relevant groups, and participate in discussions can result to connect with peers and potential partners.

3

Networking is a give and take relation, so, referring your partners when an opportunity or that matches their interests appears don't hesitate to share it with them even if they didn't request it.

## CHALLENGES AND RISKS IN NETWORKING AND MARKETING

While networking and marketing offer numerous benefits, they also come with their fair share of challenges and risks.

Understanding and addressing these potential obstacles is crucial for entrepreneurs seeking to effectively leverage networking and marketing strategies. By being aware of these challenges, entrepreneurs can develop proactive approaches to mitigate risks and maximize the impact of their networking and marketing efforts.

- **Lack of Targeted Approach:** When networking and marketing efforts are not directed towards a specific audience or market segment, there is a risk of wasting time and resources on connections or campaigns that may not deliver meaningful results. Without a targeted approach, entrepreneurs may struggle to effectively engage with the right people or reach their intended audience.
- **Overlooking Relationship Building:** Networking is about building relationships based on trust and mutual support. Focusing solely on transactional interactions or short-term gains can hinder the development of long-lasting connections. Neglecting the relationship-building aspect of networking may limit the potential benefits and opportunities that arise from establishing meaningful professional relationships.

- **Information Overload:** In today's digital age, there is a vast amount of information available through networking platforms and marketing channels. Entrepreneurs may face the challenge of sorting through this plethora of information, filtering out the relevant and valuable insights, and avoiding being overwhelmed or distracted by irrelevant content.
- **Rejection and Disinterest:** In networking and marketing, there is always a possibility of encountering rejection or disinterest from potential contacts or target audiences. Not everyone may be receptive to networking requests or marketing messages. Dealing with rejection requires resilience and perseverance to continue seeking new opportunities and refining marketing strategies.
- **Time and Resource Constraints:** Networking and marketing activities require time, effort, and sometimes financial resources. Entrepreneurs may face challenges in balancing these activities with other business responsibilities. Allocating sufficient time and resources to networking and marketing initiatives is essential for their effectiveness and long-term success.

It's important to note that while these challenges and risks exist, they can be mitigated or overcome with proper planning, continuous learning, adaptability, and a strategic approach to networking and marketing efforts.

## 5. Training activities:

Within these pages, you'll discover a collection of hands-on activities tailored to enhance critical aspects such as innovation, adaptability, communication, and problem-solving.

Whether you're a facilitator guiding a group or an individual learner, these dynamic exercises offer a diverse range of interactive experiences that cater to various learning styles.

Let this chapter be your guide in unleashing the full potential of entrepreneurial skills through engaging and transformative activities.

<b>Activity 1</b>		<b>“The Startup Challenge”</b>
<b>SPACE AND TECHNICAL REQUIREMENTS (MATERIALS, TIME, ETC..)</b>		Unit 2: Leadership Time required: 60-120 mins Space needed: one room Resources: Flipchart paper, A4 paper, pens, markers.
<b>EXPECTED LEARNING OUTCOMES</b>		Develop new skills and knowledge. This can come in many forms, from formal course taking to casual social learning. It involves self-initiative and taking on challenges.
<b>THE SESSION</b>	<b>STEP</b>	<b>DESCRIPTION</b>
	1. Introduction (15 mins)	<ul style="list-style-type: none"> <li>- Welcome participants and provide an overview of the simulation.</li> <li>- Explain the objectives: to enhance leadership skills in a startup scenario. Form small teams, ensuring a diverse mix of participants in each group. (you could give each small group a different scenario and they have to work alongside other groups to fulfil their task or give the whole group 1 scenario and each participant has a unique role to fulfil their tasks and work together)</li> </ul>
	2. Scenario Assignment (10 mins):	<ul style="list-style-type: none"> <li>- Assign each team a simulated startup scenario, complete with a unique product or service, market conditions, and initial challenges. Clearly define roles within each team (See below for example assignments and roles)</li> </ul>

THE SESSION	STEP	DESCRIPTION
	<p>3. Simulation Rounds (45 mins):</p>	<ul style="list-style-type: none"> <li>- Conduct rounds where participants can interact with each other to make connections, trade, plan ideas, strategies, etc.</li> <li>- Introduce challenges and opportunities.(See below for examples).</li> <li>Teams make decisions on product development, marketing strategies and team management.</li> </ul>
	<p>4. Reflection (10 mins):</p>	<ul style="list-style-type: none"> <li>- Ask participants to reflect individually on their experience during the simulation.</li> <li>Facilitate a discussion on key insights, lessons learned and the application of leadership skills in a dynamic environment.</li> </ul>
	<p>5. Conclusion (10 mins):</p>	<ul style="list-style-type: none"> <li>- Summarise key takeaways.</li> <li>-Encourage participants to apply the learned leadership skills in their entrepreneurial endeavours</li> </ul>
<p><b>DEBRIEFING</b></p>		<p>How did the participants feel?</p> <ul style="list-style-type: none"> <li>-What styles of leadership did you see/use?</li> <li>-Did you achieve your task? How?</li> <li>-What problems did you encounter? How did you solve? What did you do?</li> <li>-How did you work as a team?</li> <li>-Did you follow the typical leadership styles of the role?</li> </ul>

\*CONTENT:

- Example of Scenarios: Innovation Startup "Virtual Reality Revolution", Sustainable Energy Venture: "CleanTech Innovators".
- Example of challenges: Technical Uncertainties, Investor Attraction, Ethical responsibility.
- Example of roles: CEO, Product Manager, Innovation Coordinator, Market Research.

## Activity 2

## Organizational & Continuous Learning

### SPACE AND TECHNICAL REQUIREMENTS (MATERIALS, TIME, ETC..)

Unit 4: Organizational & Continuous Learning.  
Time: 60 mins Space: one room  
Resources: Flipchart paper, A4 paper, pens, markers.

### EXPECTED LEARNING OUTCOMES

Develop new skills and knowledge. This can come in many forms, from formal course taking to casual social learning. It involves self-initiative and taking on challenges.

### THE SESSION

### STEP

### DESCRIPTION

1. Introduction  
(10 mins)

- Welcome participants and introduce the session topic.
- Briefly explain the objectives of the session.
- Set their expectations for the session.

2. Overview of Organizational Learning & Online Learning  
(10 min)

- Define organizational learning and online learning.
- Discuss the importance of these concepts in today's business environment.
- Highlight the benefits of integrating organizational learning with online learning platforms.

**THE  
SESSION**

**STEP**

**DESCRIPTION**

3. Identifying  
Needs and  
Objectives (15  
mins):

- Discuss how organizations can identify learning needs and set clear learning objectives.
- Explore different methods for assessing employee skills, knowledge gaps, and training requirements.
- Share examples of organizations that have effectively identified learning needs and aligned them with business goals.

4. Selecting and  
Implementing  
Online Learning  
Platforms (20  
mins):

- Introduce types of online learning platforms.
- Discuss key considerations for selecting and implementing online learning platforms.
- Provide tips for evaluating and choosing the right online learning solutions for your organization's needs.

5. Creating  
Engaging  
Learning Content  
(15 mins):

- Summarise key takeaways.
- Encourage participants to apply the learned leadership skills in their entrepreneurial endeavors.

**DEBRIEFING**

- Open the floor for questions, comments, and reflections.
- Summarize takeaways from the session.
- Thank participants for their participation and encourage them to apply what they have learned in their organizations.

### Activity 3

### Creativity, innovation, and valuing ideas

#### SPACE AND TECHNICAL REQUIREMENTS (MATERIALS, TIME, ETC..)

Creativity, innovation, and valuing idea  
Time: 60 mins Space: one room  
Resources: Flipchart paper, a4 paper, pens, markers

#### EXPECTED LEARNING OUTCOMES

Participants will learn about strategies and best practices for creating a supportive environment that promotes creativity and innovation within teams and organizations.

#### THE SESSION

#### STEP

#### DESCRIPTION

1. Introduction  
(10 mins)

- Welcome participants and introduce the session topic.
- Briefly explain the objectives of the session.
- Set their expectations for the session.

2. Understanding Creativity and Innovation (20 min)

- Define creativity and innovation and discuss their importance in organizational settings.
- Explore the relationship between creativity, innovation, and organizational success.
- Share examples of innovative companies and individuals who have embraced creativity and transformed industries.

3. Techniques for Generating and Developing Ideas (20 mins):

- Introduce various techniques and tools for the generation of ideas, such as brainstorming, mind mapping.
- Facilitate a hands-on activity where participants practice using these techniques to generate and develop ideas.
- Encourage participants to experiment with different approaches and embrace unconventional thinking.

**THE  
SESSION**

**STEP**

**DESCRIPTION**

4. Overcoming  
Barriers to  
Creativity and  
Innovation (15  
mins):

-Identify common barriers and challenges that may include creativity and innovation within organizations, such as fear of failure, resistance to change, and lack of resources.  
-Discuss strategies for overcoming the barriers and fostering a resilient culture that embraces experimentation and learning from failure.

5. Action Planning  
(10 mins):

-Facilitate a discussion where participants reflect on the session.  
-Encourage participants to identify specific actions they can take to cultivate creativity, innovation, and idea-sharing within their teams.  
-Prompt participants to set SMART goals and create an action plan for implementation.

**DEBRIEFING**

- Open the floor for questions, comments, and reflections.
- Summarize takeaways from the session.
- Thank participants for their participation and encourage them to apply what they have learned in their organizations.

# Projects, trainings, opportunities for developing entrepreneurship skills

## ERASMUS FOR YOUNG ENTREPRENEURS

- The European exchange programme for Entrepreneurs, known as Erasmus for Young Entrepreneurs (EYE), aims to support aspiring European entrepreneurs by providing them with the necessary skills to start and run a small business in Europe. The program facilitates a collaboration between new entrepreneurs and experienced ones, where they exchange knowledge and business ideas during a 1 to 6-month period, partly financed by the European Commission.
- Benefits for new entrepreneurs include on-the-job training in a small or medium-sized enterprise in another participating country, easing the successful launch of their business and providing access to new markets and international cooperation. Host entrepreneurs, on the other hand, gain fresh ideas and specialized skills from motivated new entrepreneurs, often leading to a positive experience that encourages them to host others.

The collaboration is considered a win-win, offering opportunities to discover new European markets, business partners, and different ways of doing business.

The long-term benefits include extensive networking opportunities and the potential for continued collaboration, such as joint ventures or subcontracting activities.

The program is financed by the European Commission and operates across participating countries, facilitated by local contact points involved in business support. Application and participation in the program are free of charge, with no fees requested by any supporting organization.

## HOW TO APPLY?

Our advice is to contact directly any of the EYE supporting organizations in your country. You can find them here: <https://www.erasmus-entrepreneurs.eu/page.php?cid=05>.

When you get in touch with them you will have the chance to direct all your concerns, doubts and questions to specialists that know the program in depth and will be able to provide you with all additional information that you may need.

The Erasmus for Young Entrepreneurs program offers entrepreneurial opportunities with just one click, spanning 45 participating countries. Both new and experienced entrepreneurs interested in the exchange program can apply for free through an online tool, selecting their preferred local contact point to guide them throughout the process. In the absence of a local contact point in their country, entrepreneurs can register with one from another European country. Accepted participants can access an online catalog to find suitable matches and follow a step-by-step guide.

- 1** Prepare application documents (CV, motivation, and a business plan for new entrepreneurs).
- 2** Register and submit documents online.
- 3** Build a relationship with a new or host entrepreneur abroad through local contact points or the online catalog.
- 4** Reach an agreement on the exchange details, ensuring eligibility criteria are met.

5

Digitally sign a Commitment to Quality in the IT Tool and conclude financial agreements.

6

Start the abroad stay, which can last 1 to 6 months.

7

Receive financial assistance in several payments based on the agreement with the local contact point. The program supports entrepreneurial collaborations rather than internships or work placements.

Get more insights here:

<https://www.erasmus-entrepreneurs.eu/page.php?cid=4>

## REQUIREMENTS

The European mobility scheme, Erasmus for Young Entrepreneurs, is open to the participation of both aspiring or new entrepreneurs and experienced entrepreneurs. Entrepreneurs must be residents in one of the participating countries: Austria, Albania, Belgium, Armenia, Bulgaria, Bosnia-Herzegovina, Croatia, Iceland, Cyprus, Kosovo, Czechia, Lichtenstein, Denmark, Moldova, Estonia, Montenegro, Finland, North Macedonia, France, Norway, Germany, Serbia, Greece, Türkiye, Hungary, UK, Ireland, Ukraine, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden.

New entrepreneurs can participate in the Erasmus for Young Entrepreneurs program if they meet the following criteria:

- 1** They are firmly planning to start a business, supported by a viable business plan; OR they have less than 3 years of total entrepreneurial experience.
- 2** Their (future) company or activity can be in any sector, and there is no age limit (participants must be over 18 years old).
- 3** They must be permanent residents in one of the participating countries.

**4** They should have a concrete project or business idea, outlined in a business plan.

**5** They must be motivated and committed to collaborating during their stay with an experienced entrepreneur from another participating country, contributing to the development of the host entrepreneur's business and making their skills and competences available.

**6** They should be ready to complement the program funds, if necessary, to cover the costs of their stay abroad.

It's important to note that new entrepreneurs can only participate in the program once

To apply as a host entrepreneur in the Erasmus for Young Entrepreneurs program, individuals must meet the following criteria:

- 1** Be a permanent resident in one of the participating countries, with the company registered in that country.
- 2** Serve as the owner-manager of a small or medium enterprise (SME) or be a person directly involved in entrepreneurship at the SME board level (not an employee).
- 3** Have a minimum of more than 3 years of experience running a company as an entrepreneur (not an employee).
- 4** Be willing to share knowledge and experience with a new entrepreneur and act as a mentor during the collaboration.

Get more insights here:

<https://www.erasmus-entrepreneurs.eu/page.php?cid=3>

## **BENEFITS**

The Erasmus for Young Entrepreneurs program aims to educate participants about the opportunities within the Single Market and strategies to overcome business obstacles.

The program emphasizes the importance of understanding the European Union Internal Market for effective buying and selling across borders.

The training fiche on the Internal Market provides an overview of the EU Single Market, highlighting its benefits for small and medium-sized businesses.

The document covers key concepts such as the free movement of people, goods, services, and capital. Recognizing ongoing challenges, the fiche directs participants to additional information sources like the Enterprise Europe Network and SOLVIT.

It also addresses topics like the European Service Directive, Intellectual Property, access to finance, and funding opportunities, offering contact points for further assistance.

Get more insights here:

<https://www.erasmus-entrepreneurs.eu/page.php?cid=10>

## MORE INFORMATION

Official website:

<https://www.erasmus-entrepreneurs.eu/>

Program guide:

<https://www.erasmus-entrepreneurs.eu/upload/Programme%20Guide%20EN,%20Update%20Mar%202023.pdf>

More information and application details can be found on the official Erasmus for Young Entrepreneurs website.

It's a unique opportunity for individuals to broaden their entrepreneurial horizons, establish international connections, and contribute to the growth of small and medium-sized enterprises.

## ENTERPRISE EUROPE NETWORK

The world's largest support network for small and medium-sized enterprises (SMEs) with international ambitions.

The Enterprise Europe Network (EEN) plays a crucial role in supporting the international growth and innovation of businesses. As the largest global assistance network for small and medium-sized enterprises (SMEs) aspiring to expand internationally, EEN operates on a global scale. It assembles experts from esteemed member organizations known for their excellence in providing business support.

These member organizations encompass:

- Chambers of commerce and industry
- Regional development organizations
- Universities and research institutes
- Innovation agencies

*While individual businesses cannot become direct members of the Network, they can avail themselves of the numerous services it provides to foster their growth and success.*

## **Advice & Support:**

The Enterprise Europe Network aims to accelerate your business growth through tailored support, fostering new commercial partnerships, and facilitating access to finance. The international business experts within the Network possess the experience and resources to assist businesses in expanding globally, offering advice on the best market opportunities for international expansion.

## **Sustainability**

Under the Sustainability section, the Network focuses on guiding companies through their transition to more sustainable business models.

## **EU Single Market**

In the EU Single Market section, the Network helps businesses navigate EU legislations and policies, allowing them to benefit from the opportunities provided by the Single Market.

## **Digitalisation**

Under Digitalisation, the Network aids SMEs in customizing digital solutions to align with their specific business needs.

## **Innovation**

In the Innovation section, the Network enhances businesses' potential to innovate, grow, and develop disruptive products.

## **Business, Technology, and R&D Partnering**

The Business, Technology, and R&D Partnering section involve matching companies with the right business partners and promoting new technologies globally.

## **Resilience**

The Resilience section empowers SMEs by fostering business agility and resilience to future challenges.

## **Internationalisation**

Under Internationalisation, the Network supports businesses in entering international markets and seizing new commercial opportunities.

## **Access to Finance**

In the Access to Finance section, the Network helps identify sources of finance and ensures that businesses are investor-ready.

## **Access to EU Funding Programmes**

In the Access to EU Funding Programmes section, the Network identifies EU funding opportunities that align with the specific needs of businesses, providing assistance in the application process.

## HOW TO APPLY?

Business services are provided by teams of experts within each member organization of the Network, delivering personalized assistance to businesses. These professionals are well-versed in the local business environment and maintain contacts for global business opportunities.

The Enterprise Europe Network is also capable of providing a focused approach tailored to your specific business sector. Its groups of experts span across all major economic sectors, including healthcare, agri-food, intelligent energy, fashion, and textiles.

Additionally, the Network is dedicated to aiding companies in enhancing their resilience and supporting small and medium-sized enterprises (SMEs) during their transition to more sustainable and digital business models.

For information and advice, locate a local Network contact point in your region, here:

<https://een.ec.europa.eu/local-contact-points>

To apply for the Enterprise Europe Network (EEN), you can follow these general steps:

### **Visit the EEN Website**

1

Go to the official website of the Enterprise Europe Network to explore information about the network, its services, and the application process.

### **Identify Local Contact Points**

2

Locate the local contact points in your region. These are organizations within the network that provide assistance and support. You can find them on the EEN website by selecting your country and city.

### **Contact Local Network Contact Points**

3

Reach out to the local contact points in your area. They will guide you through the application process and provide information on the services available to businesses in your region.

### **Attend Information Sessions or Workshops**

4

Some local contact points may organize information sessions or workshops to explain the benefits of joining the network and how it can support your business. Attend these sessions to gain insights into the network's offerings.

### **Participate in Calls for Proposals**

5

If you are an organization interested in becoming a part of the Enterprise Europe Network, monitor calls for proposals. These calls are issued by the network to select member organizations. Submit your proposal according to the guidelines provided in the call.

## **6 Submit Necessary Documentation**

If there are specific documents required for the application, ensure that you have them prepared. This may include details about your business, its objectives, and any other information deemed necessary by the local contact point.

## **7 Follow the Application Process**

Work closely with the local contact point to follow the application process. They will guide you on any additional steps, requirements, or documentation needed to complete the application.

## **8 Engage and Collaborate**

Once accepted into the network, actively engage with the local contact point and take advantage of the services offered. Collaborate with other businesses, seek advice, and explore international opportunities facilitated by the Enterprise Europe Network.

*It's important to note that the specific application process may vary depending on your region and the local contact points involved. Therefore, reaching out directly to the local contact points will provide you with the most accurate and relevant information for your application.*

## REQUIREMENTS

The Enterprise Europe Network, initiated by the European Commission in 2008, is financially supported by the Single Market Programme (SMP) and executed by the European Innovation Council and SMEs Executive Agency (EISMEA).

### **Membership Requirements:**

Organizations within the Network, forming regional consortia, are chosen through calls for proposals.

*It's important to note that the specific application and requirement process may vary depending on your region and the local contact points involved. Therefore, reaching out directly to the local contact points will provide you with the most accurate and relevant information for your application and if you meet the required criteria.*

## BENEFITS

The Enterprise Europe Network's Approach:

**Client-Centric:** We prioritize the client's needs, making them central to the Network's mission.

**Tailored Support:** Our services are customizable, offering support to businesses at any stage of their growth path.

**Expertise:** The Network's international advisers possess the experience and resources necessary to help businesses thrive.

**Advice & Support:** Our international business experts, with extensive experience and resources, assist your business growth. Regardless of your business type, we provide advice on optimal market opportunities for international expansion.

**Partnering Opportunities:** The Network oversees Europe's largest online database of business opportunities. Explore opportunities to collaborate in manufacturing, distribution, co-development, and supply of your products, ideas, and services.

**Support from Your Local Contact Point:** Connect with your local Network contact point by selecting the country and city closest to your business location. They offer advice, support, and opportunities for international partnerships.

## **EIT - EUROPEAN INSTITUTE OF INNOVATION AND TECHNOLOGY**

The European Institute of Innovation and Technology (EIT) stands as Europe's largest innovation network, actively contributing to innovation since 2008. Operating within Horizon Europe, the EU's Framework Programme for Research and Innovation, the EIT aims to generate employment opportunities and promote sustainable and intelligent growth.

Distinguished by its partnership-based model, the EIT collaborates with organizations across business, education, and research sectors.

This unique approach facilitates the creation and commercialization of solutions addressing global challenges. These collaborative efforts are organized into ecosystems of partnerships known as Knowledge and Innovation Communities

(<https://eit.europa.eu/global-challenges>), each dedicated to addressing a specific global challenge.

The EIT's partnerships aim to nurture talent and innovation, offering diverse educational courses, services for business creation and acceleration, and research projects driven by innovation to confront the world's pressing challenges.

The European Institute of Innovation and Technology (EIT) establishes Knowledge and Innovation Communities (KICs) that are Europe-wide networks addressing specific societal challenges such as healthcare and climate change. These communities comprise partnerships between higher education institutions, research centers, businesses, investors, and public/non-profit organizations.

**The EIT currently has several KICs, each focused on distinct challenges:**

- Climate Change:
- Cultural & Creative Sectors & Industries:
- Digitization:
- Future of Food:
- Health Innovation:
- Sustainable Energy:
- Added-Value Manufacturing:
- Raw Materials:

**Each KIC works towards innovation, sustainable development, and economic growth in its respective thematic area.**

## HOW TO APPLY

The European Institute of Innovation and Technology provides a diverse range of opportunities, ranging from entrepreneurial education to various funding possibilities, all centered around innovation and business development from scratch. Each opportunity is associated with a distinct application process and specific applicant requirements. We encourage you to visit their website directly and explore the procedures that align best with your current needs, ideas, and personal and professional development goals.

You can find additional links under the "More information" section.

## BENEFITS

The EIT enhances Europe's innovation capabilities by establishing the continent's most extensive innovation network, comprising over 2,000 partners from prominent business, research, and educational institutions collaborating in over 60 innovation hubs throughout Europe.

Within the EIT Community, various innovation and entrepreneurship initiatives are offered across Europe, including courses in entrepreneurial education, research projects focused on innovation, and services for business creation and acceleration.

By providing unique opportunities for talented innovators, entrepreneurs, and students, the EIT has facilitated the establishment of more than **3,100** start-ups and scale-ups.

These ventures have successfully secured over **EUR 3.3 billion** in external capital, resulting in the creation of more than **1,170** new products and services.

Additionally, over **3,100** students have graduated from EIT-labeled master and doctoral programs, and more than **10,000** individuals have participated in entrepreneurial training within the EIT Community.

## EUROPEAN SOLIDARITY CORPS

The European Solidarity Corps provides funding and support for individuals aged 18 to 30 to engage in projects benefiting communities in Europe and beyond. Participants can contribute through volunteering, local Solidarity Projects, and humanitarian aid volunteering in various fields.

Funding is granted to organizations through calls for proposals, and interested individuals register on the European Solidarity Corps portal. The program is managed by the European Commission and implemented by entities such as the European Education and Culture Executive Agency, National Agencies, SALTOS, and the European Solidarity Corps resource center.

### Activity fields

- Creativity and culture
- Education and training
- Employment and entrepreneurship
- Environment and natural protection
- Health and wellbeing
- Physical education and sport
- Working with refugees and migrants
- Social challenges
- Disaster prevention and recovery

And many more ...

## HOW TO APPLY

### For Volunteers:

Upon completion of your registration on the [European Solidarity Corps portal](#), you will gain entry to a personalized dashboard featuring various published opportunities for volunteering and social work. Furthermore, if you indicate your availability, organizations may reach out to you for potential matching with their projects. For those interested in participating in Humanitarian Aid Volunteering, a mandatory self-assessment test and specific training (both online and face-to-face) are required to become part of the candidate volunteer pool.

Get more insights at:

[https://youth.europa.eu/solidarity/young-people/about\\_en](https://youth.europa.eu/solidarity/young-people/about_en)

### For Organizations:

Before applying for funding from the European Solidarity Corps, organizations should follow several preparatory steps:

1

Familiarize yourself with the General call for proposals and the European Solidarity Corps Guide, which outlines the rules and conditions for accessing funding and conducting projects.

- 2** Confirm your organization's eligibility, considering that eligible organizations can be public, private, or non-profit. Check if your country is on the list of eligible program and partner countries.
- 3** Obtain an ID for your organization (OID) by registering on the dedicated portal for organizations, acquiring the necessary number for completing the application form.
- 4** Apply for the Quality Label, a prerequisite for funding applications (not required for Solidarity Projects).
- 5** Find a partner if applicable, particularly for activities requiring collaboration with organizations in other countries. The database of organizations can aid in identifying suitable partners.
- 6** Decide on your project by exploring eligible activities under the volunteering and occupational strands. Develop your idea, draft a project proposal, and determine the permissible duration, start, and end 7. dates.
- 7** Check the deadline and submission dates to ensure timely application submission, as late submissions will not be considered.
- 8** Complete the application form using the correct form for the chosen strand, activity, and funding round. Allocate sufficient time, ensure accurate completion of all fields, and validate the form before submission.

Get more insights at:

[https://youth.europa.eu/solidarity/organisations/about\\_en](https://youth.europa.eu/solidarity/organisations/about_en)

## REQUIREMENTS

### **For Volunteers:**

#### Age Limit:

Registration is open from the age of 17, but participation in a project is allowed only from the age of 18.

The participation age limit is up to 30 years (35 for Humanitarian Aid Volunteering).

#### Requirements:

Commitment to upholding European Solidarity Corps principles is essential.

Participants can engage in one long-term volunteering activity (2–12 months) but are allowed to participate in team volunteering activities and Solidarity Projects.

For short-term individual volunteering activities (up to 2 months), participants can also take part in one long-term activity, team volunteering and Solidarity Projects.

### **For Organizations:**

Organizations may be eligible for European Solidarity Corps funding to develop projects focusing on various societal and community-oriented areas. This includes activities such as encouraging democratic participation, fighting social exclusion, protecting nature, promoting health and wellbeing, supporting education and training, working with migrant communities, and strengthening the capacity of vulnerable or disaster-affected communities in specific regions.

## **BENEFITS**

### FOR ORGANIZATIONS

The funding brings numerous advantages, enabling organizations to do more, tap into the skills of enthusiastic young individuals, create meaningful learning experiences, introduce fresh ideas, and establish stronger connections with the local community.

The European Solidarity Corps supports volunteering activities, solidarity projects, and volunteering under the European Voluntary Humanitarian Aid Corps in regions with humanitarian aid activities.

If approved, organizations gain access to a pool of motivated young people aged 18 to 30 (35 for Humanitarian Aid Volunteering) through the European Solidarity Corps portal, allowing them to advertise opportunities and connect with potential participants.

## FOR VOLUNTEERS:

Participating in the European Solidarity Corps (ESC) offers young individuals a myriad of benefits, including the development of versatile skills such as communication and leadership, exposure to diverse cultures fostering global awareness, personal growth, and increased self-confidence. The program provides valuable work experience, opportunities for language learning, and networking on an international scale. Engaging in solidarity projects allows participants to make a positive impact on communities, contribute to societal development, and gain a sense of personal satisfaction. Additionally, ESC offers unique opportunities for humanitarian aid volunteering, travel experiences, and access to a range of opportunities through the program portal, promoting both personal and professional development while obtaining a Quality Label for commitment to quality in volunteering and solidarity activities.

## **AIESEC**

AIESEC is a global youth-led organization that provides international exchange opportunities, including voluntary projects and internships. While it is not exclusively focused on solidarity, it offers diverse experiences in areas such as social entrepreneurship, cultural understanding, and leadership development.

AIESEC facilitates the development of values deemed crucial for leaders:

- Demonstrating Integrity
- Striving for Excellence
- Enjoying Participation
- Acting Sustainably
- Activating Leadership
- Living Diversity

## HOW TO APPLY

The AIESEC application process involves three straightforward steps:

- 1** Sign up: Create an account on the AIESEC platform and complete your profile with all the necessary details.
- 2** Go through our selection process: Each local team has specific recruitment periods. Once you sign up, you will be informed about the subsequent steps to become a member of your local team.
- 3** Welcome Onboard: If successful in the selection process, you will be invited to join one of the teams. You will receive an induction and begin a new role as a team member, marking the commencement of your leadership development experience.

## REQUIREMENTS

AIESEC membership is generally open to young individuals who meet certain criteria. While eligibility requirements may vary slightly among different AIESEC entities, the typical criteria include:

### **Age Range:**

AIESEC membership is often targeted at young people between the ages of 18 and 30.

### **Interest in Leadership Development:**

Individuals interested in personal and leadership development, with a commitment to contributing to positive change, are often encouraged to join.

### **Educational Status:**

AIESEC is often associated with university environments, and many members are university students or recent graduates. However, eligibility is not strictly limited to this group, and non-students may also be eligible.

### **Commitment and Motivation:**

AIESEC looks for individuals who are committed to making a positive impact, motivated to engage in cultural exchange, and willing to contribute to the organization's mission.

*It's important to check with the specific AIESEC entity or local team you are interested in joining, as eligibility criteria may vary based on the region or country.*

## BENEFITS

AIESEC encourages personal development by fostering practical learning experiences to enhance self-management and interpersonal skills, aiming to cultivate well-rounded individuals. Participants have the opportunity to learn leadership skills in an empowering and challenging environment, promoting the development of value-driven leaders. Building a diverse network is emphasized, allowing individuals to connect with like-minded young people globally and locally. Additionally, involvement with AIESEC impact programs provides a platform to contribute to creating a better world, offering further leadership opportunities for participants.
